...the tube to define planar portions disposed substantially normal to said side walls and one of said side walls is adapted to contact a side wall of an adjacent tube in the core", which corresponds to claim 1 of the '585 patent.

Applicant believes that the claims as currently amended more precisely correspond to those of a patent with which an interference is sought. While Applicant believes that the claims as originally issued in connection with U.S. Patent No. 6,332,495 ("the '495 patent"), for which reissue is sought, are directed to the same patentable invention as the claims in the '585 patent, Applicant believes that the reissue claims presented herein more accurately correspond to the same invention claimed in the '585 patent and wish to provoke such an interference as is permitted by the M.P.E.P. See M.P.E.P. § 1449.02.

Applicant hereby offers to surrender original U.S. Patent No. 6,332,495 pursuant to 37 C.F.R. § 1.178(a) upon an indication that the reissue application will be allowed.

All errors corrected in this reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant.
